Livingston's "True Blue" Seeds

For Market Gardeners and Florists

To our Customers and Gardening Friends

This catalog represents the accumulation of experience in growing and selecting "True Blue" Seeds during the past 93 years. During this long period, Livingston's have developed strains of unusual merit that are particularly adaptable to the needs of today's highly competitive market. The **High Grade General, Certified and Extra Select Strains** offered herein are worthy of the consideration of all growers who recognize the value and profit possibilities in Quality Seeds.

Notwithstanding weather conditions and labor shortages, we have again harvested a fair crop of seeds of most items. However, the increased demand for all items of food for our allies as well as ourselves, is going to, in turn, create an enormous demand for seeds and serious shortages may develop before planting time.

Long distant transportation of vegetables will be to some extent restricted, and this will put an additional demand on the local gardener to produce enough more to supply his area.

The vigorous campaign for Victory Gardens sponsored by the Government will create a big demand for vegetable and flower plants which the local gardener and florist will be expected to furnish.

Extensive plans and preparations have been made at our new plant to take care of the increased seed demand, and your orders will receive careful and prompt attention. However, in view of the extra demand for "Food for Victory" and the possible shortages of seeds, may we suggest that you place your order NOW so that you can get, as nearly as possible, your full requirements.

Trial Ground Tests Assure You of Quality Seeds

Mary Washington Asparagus

Again emphasis is placed on our trial ground operations and their value to the gardener who demands quality seeds. At our "True Blue" Farm these trials, as illustrated at left, have been in progress since 1850. During these 93 years super foundation stocks have been developed from which are grown many of the strains we offer. Here, each year, many other general strains are tested and complete records maintained and used in selecting the strains offered to the trade. Livingston's "True Blue" Seeds, backed by this testing program, have unusual merits that appeal to the most critical trade.

This catalog offers **High Grade General, Certified** and **Extra Select Strains** of seeds that will meet the most exacting requirements.

Asparagus

One ounce will sow 60 feet of drill, 400 plants to an ounce.

Paradise. Sensationally new, early maturing, rust-resistant variety, producing normal crop one year earlier than others and a heavier crop throughout its life. Large, crisp, tender stalks with fine, mild flavor; 6 to 8 stalks make a pound. Fully as rust-resistant as Mary Washington. Ideally suited for freezing; excellent for commercial growers and shippers. Should take the country by storm. Illustrated on page 2. Pkt. 10 cts.; $\frac{1}{2}$ oz. 15 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 65 cts.; lb. \$2.00.

Mary Washington. This variety is the last word in the rust-resistant sorts. It is very early, producing large shoots, even the second year from seed, sometimes an inch in diameter, with a tendency to be oval in cross-section. Its high-branching habit makes it possible to cut shoots, with good tight tip buds, as much as 2 feet long. Further, the tips do not "sprangle out" or "blow" prematurely. The seeds are large and tend to produce strong, thrifty seedlings right from the start. Pkt. 10 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.00; 5 lbs. \$4.75.

Asparagus Roots

MARY WASHINGTON. High grade, one year stock grown from choice seeds of above strain. Doz. 35 cts.; 100 for \$2.25, postpaid. **Write for price on larger quantities.**

Claus Gloyer, Douglas Co., Nebr.: "I have been buying Seeds for about 40 years, but since I started buying your Seeds, I found which is the best. I recommend your seeds to everybody that wants No. 1 Seed, they may be trifle higher than some houses sell, but they make up in Quality. I recommend them to everybody as the best."

Livingston's Giant Oxheart Tomatoes

The Big Tomato Everybody Is Talking About

Truly the giant of them all. Different from any Tomato you have ever grown in shape, size or in flavor. Three pound specimens are quite common; one customer sent us a single fruit that weighed five pounds.

Very popular with home gardeners and brings fancy prices in city and roadside markets.

Livingston's Giant Oxheart. Introduced by us in 1925. Attractive pink skinned variety; exceedingly smooth and tender and almost seedless, frequently showing 2 inches thick without a seed cavity. It has that delicious mild flavor that every lover of this fruit likes so well. Its attractive shape, large size and excellent table qualities have brought it into deserved popularity. Rich soil adds greatly to its productiveness. 87 days. **Selected seed, grown by us.** Pkt. 10 cts.; $\frac{1}{4}$ oz. 30 cts.; $\frac{1}{2}$ oz. 45 cts.; oz. 75 cts.; $\frac{1}{4}$ lb. \$2.25; lb. \$8.00.

Livingston's New Yellow Oxheart. Introduced by us in 1929. A new variety of our Oxheart-type above. Same shape but a trifle smaller in size. The skin and flesh are a rich shade of yellow. Deliciously mild and decidedly appetizing, especially when served mixed with Pink Oxheart. 85 days. Pkt. 10 cts.; $\frac{1}{4}$ oz. 30 cts.; $\frac{1}{2}$ oz. 55 cts.; oz. 85 cts.; $\frac{1}{4}$ lb. \$2.50; lb. \$9.00.

Other Big Tomatoes

Ponderosa. The pink fruits ripen quite early, are very solid, almost seedless, of good sub-acid flavor, and of immense size, frequently weighing more than two pounds. It is now producing a much smoother fruit than when first introduced. Splendid slicer. Late variety. 84 days. Pkt. 10 cts.; $\frac{1}{4}$ oz. 20 cts.; $\frac{1}{2}$ oz. 35 cts.; oz. 55 cts.; $\frac{1}{4}$ lb. \$1.75; lb. \$5.75.

Livingston's Buckeye State. Introduced by us in 1893. Its extra large fruits are borne in clusters of three to six, and have a smooth skin of purple color. The fruit is very meaty, solid, and the flesh is of most desirable quality. We have been successful in eliminating the roughness so common to large-fruited sorts. Late variety. 80 days. Pkt. 10 cts.; $\frac{1}{4}$ oz. 15 cts.; $\frac{1}{2}$ oz. 25 cts.; oz. 45 cts.; $\frac{1}{4}$ lb. \$1.25; lb. \$3.75.

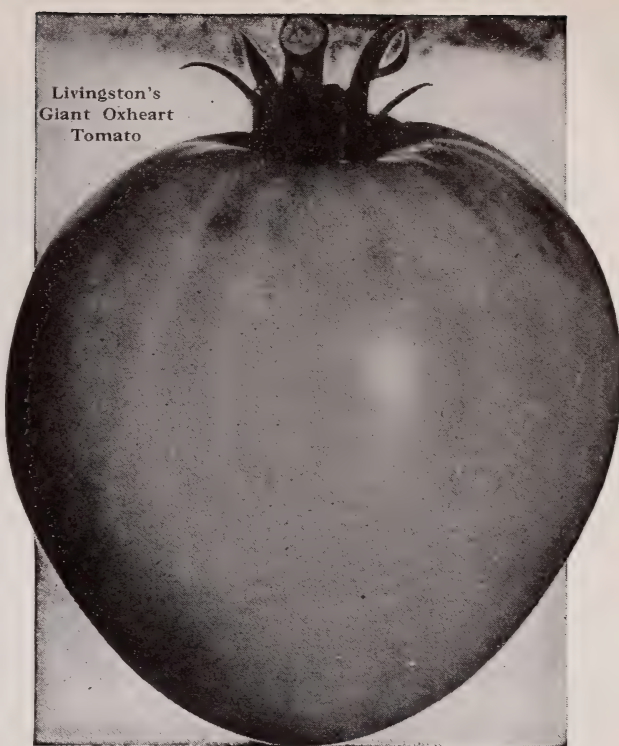

Crimson Cushion (Beefsteak). A red Ponderosa. It is an extremely large, bright red variety that ripens evenly and is of good quality. 84 days. Pkt. 10 cts.; $\frac{1}{4}$ oz. 20 cts.; $\frac{1}{2}$ oz. 35 cts.; oz. 55 cts.; $\frac{1}{4}$ lb. \$1.70; lb. \$5.50.

Italian Tomato. A large, solid, non-acid pink potato leaf variety with few seeds. Suitable for road stand markets and home gardeners. Not a commercial variety. Retail plant growers should try it. Pkt. 25 cts.; $\frac{1}{4}$ oz. 35 cts.; $\frac{1}{2}$ oz. 60 cts.; oz. \$1.00.

Brimmer. Immense fruits of splendid flavor; very solid and meaty. The vines are vigorous, healthy and bear heavily right up to frost. The tomato has practically no core, very few seeds, pink in color and well shaped for being so large. Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.; $\frac{1}{2}$ oz. 40 cts.; oz. 70 cts.; $\frac{1}{4}$ lb. \$2.15; lb. \$7.50.

Fred Pointner, Essex Co., New Jersey: "I raise Tomato plants in a small way for neighbors, about 4,000 plants and have only used one variety for them and myself for about 30 years, 'The Livingston Globe.' After comparing with the Pritchard, Oxheart, Matchless, etc., they all want the Livingston Globe." Anna Williams, Clark Co., Illinois: "I have used your seeds for a number of years and find them as you represent them to be."

All our grasses are fancy, heavy weight grades, mixed in proportions to give the ultimate in lawn satisfaction and the prices are most reasonable.
